

BRUSH CUTTERS

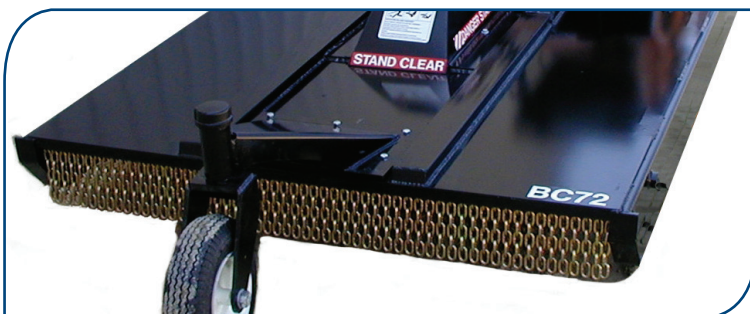

Features	Advantages	Benefits
Heavy Duty Design	Increased Strength and Long Life	Increased Attachment Life; Increased ROI
Dual Rotation Double Edge Blades	Allows Operation in Rear or Side Discharge Modes	Increased Productivity; Increased ROI
Rotation Indicator	Allows Operator to See Visible Indicator of Blade Rotation Speed	Increased Productivity; Increased ROI

BRUSH CUTTER

Bradco's heavy-duty brush cutter offers easy maintenance with access ports and hinged shrouding. The high deck clearance and smooth unobstructed deck design prevents debris from building up to improve overall performance.

- Motor options for 15-40 GPM flow with internal relief for drive system protection and fast controlled shut down
- High-speed, dual rotation blades, for brush and small trees up to 4" in diameter (blade options available)
- Stump jumper for ease of operation and gear box protection

Specifications	BC60	BC72	BC78
Height (overall)	22.5"	22.5"	22.5"
Length (overall)	78"	90"	96"
Minimum Cutting Height (skid shoes on ground)	2"	2"	2"
Deck Height	9"	9"	9"
Cutting Width	60"	72"	78"
Width (overall)	72"	85"	91"
Cutting Capacity (maximum cutting diameter)	4"	4"	4"
Deck Thickness	.25" steel	.25" steel	.25" steel
Recommended Skid-Steer Hydraulic GPM	15-30	18-40	32-40
Required Skid-Steer Lift Capacity (lbs)	1300	1700	1800
Weight (lbs)	1230	1610	1666

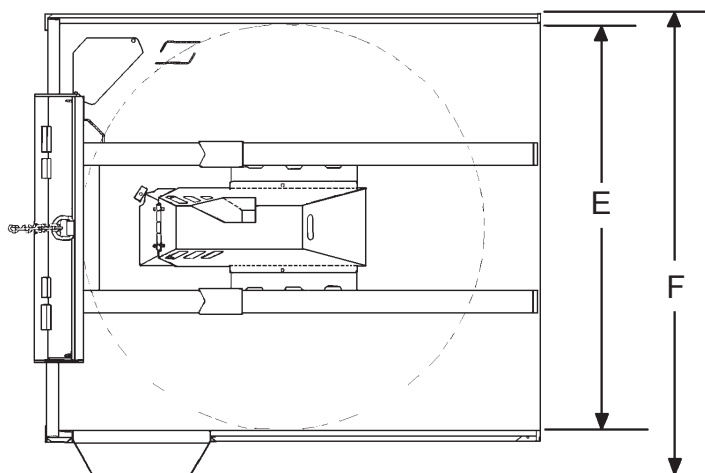

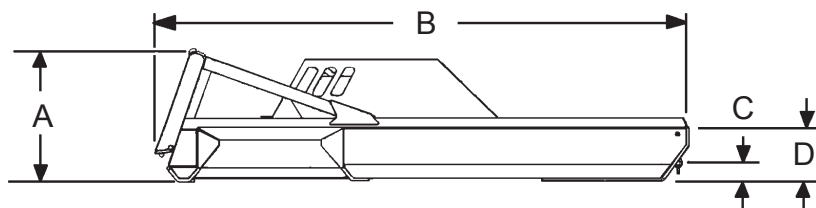

Typical Blade Tip Speed (ft/min)	60"	60"	72"	72"	72"	78"	78"
Flow (GPM)	15-20	25-30	18-22	26-32	32-40	26-32	32-40
18 GPM	15,100						
20 GPM			16,700				
28 GPM		15,600					
30 GPM				15,240		16,510	
36 GPM					15,790		17,100

BRUSH CUTTERS

The Bradco Brush Cutter's high-speed, dual rotation blades are for brush and small trees up to 4". Includes exclusive blade stall indicator to warn the operator of overload conditions. Blade options include a heavier single-edged curved blade or a double-edge blade for maximum performance.

The rotary cutter features include an output shaft seal protection, side discharge with flow control baffle and lift limiting retention chain.

- Heavy-duty brush cutter offers easy maintenance with access ports and hinged shrouding
- The high deck clearance and smooth unobstructed deck design prevents debris from building up & improves overall performance
- Features include output shaft seal protection, side discharge with flow control baffle and lift limiting retention chain
- High flow and standard flow available
- Heavy-duty 1/4" thick high strength steel deck with formed stiffened side plates and heavy-duty full length skid shoes for added strength and mower deck life
- 1 year warranty
