

Cotech Skid Steer Snow Bucket

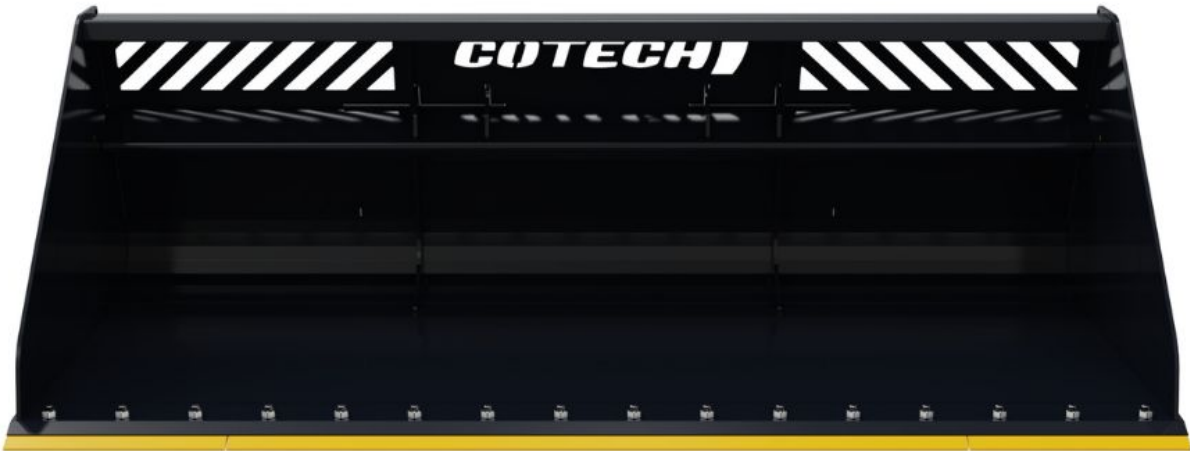

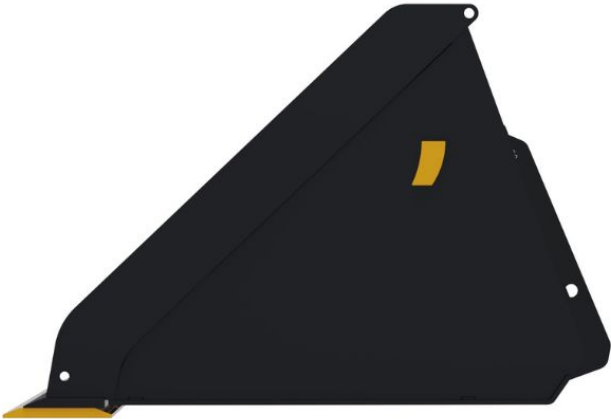

Ideal for moving mulch, sand, and snow.

BSLM buckets for compact loaders and skid steers are designed for handling light materials such as wood chips, sawdust, mulch, sand and snow. Their increased height and depth provide greater loading capacity. The perforated design improves operator visibility, allowing for safer and more precise operation. The reversible bolt-on cutting edge simplifies maintenance and extends the service life of the attachment. The SKID bracket is integrated into the bucket.

All buckets include 8" x $\frac{3}{4}$ " replaceable bolt on edge.

Cotech Skid Steer Snow Bucket
