

Mx Series

Power Box Rake®

HARLEY

PALADIN LIGHT CONSTRUCTION

FEATURES:

- **Dual side-mounted angle cylinders** are in line with frame for added strength and balance of power when angling.
- **More powerful hydraulic motor.** Proven drive system with hydraulic motor safely up and out of the dirt.
- **Pure carbide proprietary teeth design.** Not just carbide tough for long life, but specially shaped to ensure the best possible seedbed sub-base fracture pattern and superior moisture retention and release.
- **Quick and easy removable endplates** for windrowing and reverse box raking...no bolts, just pull the pins.
- **Dual independently adjustable gauge wheels** allow for skim passes for over-seeding - or - adjust to cut drainage grades.
- **Heavier main frame, pivot plate and attachment plate.**

Easy to use, easy to maintain!
Fixed position makes the rake so easy to use, new operators can be productive in no time. Only six grease fittings to maintain.

A simple yet rugged yoke assembly allows the rake to angle 20 degrees to either side for wind-rowing. No extra valves, hoses, or wires means you get extra capabilities at a reasonable cost. Get the complete raking function you want in an affordable, uncomplicated package.

Enjoy total angling operation from your mini-skid steer! For maximum control and productivity...this is the package that made Harley famous...now with dual cylinders.

FEATURES:

- Innovative modular design lets you choose or upgrade from the straight mount or manual angle mount to full hydraulic angle capability.
- Triple-sealed and shielded bearings for extra protection and long life.
- Slim profile frame bearing ends allow full-depth and first-pass teeth penetration...saving you time.
- Harley's well designed frame geometry offers excellent visibility of your work surface.
- Harley comes complete with all electrical and hydraulic connections included. Not as extra hidden costs.
