SKID STEER & MINI-EXCAVATOR EARTH AUGER DRIVES (H0-SERIES)

Premier Attachments offers four models in the Heavy Duty H0-Series Auger Drives. The Heavy-Duty auger drives are built with industrial grade components for the toughest of drilling conditions.

- No drain line is required
- 5 Year Warranty
- All Auger Drives are designed and engineered for the higher hydraulic pressures of today's equipment
- Universal Skid Steer mount is an industry standard for all makes and models, however we do offer late model obsolete mounts for those older machines
- Output shafts available in 2" hexagon and 2-9/16" round
- Premier's proprietary Labyrinth Seal allows for multiple sealing surfaces within the seal to defend against dirt coming in and oil leaking out. The five different seals outperform the basic double seal used by other manufacturers.
