

### **SMALL FRAME BREAKER**

*Made for Mini Skid and MT Mounting systems*

The Small Frame Power Breaker is the most compact breaker in the Premier lineup, purpose-built specifically for mini skid steers and MT mounting systems. Designed for operators who need reliable breaking power in tight, urban, and noise-sensitive environments, this breaker delivers strong impact performance without sacrificing efficiency or control.

Equipped exclusively with Premier's patented Duo-Tach® mounting system (Patent No. 11,280,057), it provides seamless compatibility across both Mini Skid (CII – Common Industry Interface) and Bobcat MT mount platforms. Switching between machines requires no tools and no adapters—ideal for contractors and rental fleets running mixed equipment.

#### **Engineered for Performance and Efficiency**

The Small Frame Power Breaker features a fully enclosed, heavy-duty sealed housing that protects internal components while reducing vibration and noise transfer to the carrier. Its nitrogen accumulator gas-assist design improves impact efficiency while reducing demand on the hydraulic system to help maximize productivity.

| Model                  | PB250     | PB350     |
|------------------------|-----------|-----------|
| Weight (lbs.)          | 277       | 334       |
| Length (In.)           | 49        | 53        |
| Flow (gpm.)            | 5-12      | 8-14      |
| Blows per. Min. (bpm.) | 700-1,200 | 600-1,100 |
| Energy Class (joule.)  | 284       | 427       |
