SB HOPPER BROOM & COLD PLANER SPECIAL

The SB Hopper Broom and Cold Planer Special handles light and heavy-duty clean-up in construction, municipal and industrial applications. The bi-directional broom sweeps forward to pick up dirt and reverses to sweep in tight areas. Direct-drive bush motors eliminate chains and sprockets.

The Cold Planer Special brush operates in reverse to collect millings into the hopper. A special brush design has dense fill in the middle to effectively clean cuts, the center sections are compacted, dense filled wafers.

- Available in 60", 72", and 84" widths
- 26" diameter brush
- Head locks down to bucket/hopper for extra brush pressure
